ADEL ALMUHTASEB

BACKEND & ERP DEVELOPER
CS & ENGINEERING STUDENT

ABOUT ME

Fourth-year CS student who builds backend systems and automates things that probably didn't need automating, but run better now. I've optimized slow databases, built a museum exhibit powered by NFC chips, and trained an AI model to recognize ancient artifacts. Give me a problem and a deadline, and I'll figure out the rest.

TECHNICAL SKILLS

- **Programming Languages:** Python, C++, Java, HTML, JavaScript
- **Frameworks:** Flask, Node.js, Express
- **Backend:** REST API Development, Backend Systems
- **Databases:** MySQL, SQL Query Optimization, Database Schema Design
- **ERP & Business Tools:** SoftOne ERP, Custom Module Development
- **Web & Software Tools:** Git, Postman
- **Cloud & Infrastructure:** AWS, Azure
- **Operating Systems:** Linux
- **Concepts**: Algorithm Development, Basic Statistical Analysis

EDUCATION

2022 – 2024 | AMERICAN COLLEGE IN NICOSIA

- **Associate Degree in Computer Science**
  - Completed 2-year degree prior to transfer
  - GPA: 3.85

2024 – EXPECTED GRADUATION :2027 | AMERICAN UNIVERSITY OF BEIRUT – MEDITERRANEAN

- **Computer Science and Engineering (BSc)**
  - Relevant coursework: Data Structures, Algorithms, Object-Oriented Programming
  - Current GPA: 3.80

PROJECTS

- **Heritage Trace - Crowdsourced Heritage Preservation Platform (2026)**
  - Built a full-stack platform (Flask, React, React Native) for crowdsourced documentation of at-risk heritage artifacts, with AI-assisted tagging and a researcher verification dashboard
  - Fine-tuned a PyTorch image classification model, achieving 85-95% validation accuracy on artifact categorization
  - Deployed backend (Render/PostgreSQL) and dashboard (Netlify) with CI/CD via GitHub Actions
  - Demoed to a UNESCO Chair contact, with discussions underway for a pilot in Germany or Estonia
  - github.com/AdelAlmuhtaseb/Heritage-Trace

- **Dig in History — UNESCO Cultural Heritage Project (Erasmus+ Blended Mobility, 2026)**
  - Built an interactive museum exhibit for the Archaeological Museum of Paphos where visitors dig up NFC-chipped artifacts that automatically play multilingual videos on a tablet
  - Developed as part of a DAAD-funded international collaboration between universities in Cyprus, Germany, and Estonia
  - Tech stack: Python Flask, Raspberry Pi 4, RC522 NFC reader, custom single-page web app
  - Adapted by a German university team for independent museum deployment
  - https://github.com/AdelAlmuhtaseb/Dig-in-History/tree/main

WORK EXPERIENCE

SOFTWARE ENGINEERING INTERN

- **Просветени системи (Educational Systems) | Varna, Bulgaria | Remote | Jan-June 2026 (6 months)**

- Developed and integrated JWT-based authentication system for an internal web application using Python Flask and JavaScript
- Built and styled responsive dashboard UI components consumed by internal company users
- Containerised parts of the application using Docker to support consistent development environments
- Worked independently across the full stack, contributing to both backend API logic and frontend interface

BACKEND & ERP DEVELOPER

- **FutureSys | Paphos, Cyprus | In-Person | June-Aug 2026 (3 months unpaid Internship)**

- Built and maintained backend systems and RESTful APIs for client infrastructure
- Optimized SQL queries, reducing data retrieval time from ~2 minutes to under 1 minute
- Developed 5 custom SoftOne ERP modules to automate client business workflows

MANUAL QA TESTER

- **Remote | Jordan-based Company | May 2023 – Aug 2025 (2 years 3 months)**

- Over 2 years of experience in manual testing of software products.
- Skilled in test case design and execution based on business requirements.
- Experience in functional, regression, and verification testing.
- Knowledge of SQL and database testing for data validation.
- Experience in API testing using Postman.
- Familiar with Git for version control.
- Skilled in identifying, documenting, reporting, and tracking software defects.
- Experienced in documenting test results and collaborating with development teams to ensure software quality.
- Strong attention to detail, organisational skills, and commitment to continuous improvement.

DATABASE & SYSTEMS INTERN

- **American College | In-Person | Feb-June 2023 (5 months unpaid internship)**

- Designed and built database tables for a student management system handling 800+ student records
- Wrote and executed SQL queries to retrieve and manage student data
- Handled data entry and maintained data integrity across the system

IT SUPPORT & SYSTEMS ADMINISTRATOR

- **Remote | Jordan-based Company | Jan 2021 – Feb 2023 (~2 years)**
- Maintained Windows systems, user accounts, and IT infrastructure.
- Supported Microsoft 365, Azure, and user access management.
- Troubleshot hardware, software, and system-related issues.
- Assisted with endpoint management, security hardening, and patch management.
- Managed user permissions and supported IT security policies.
- Used PowerShell to automate tasks and maintained technical documentation.
- Collaborated with IT teams to resolve incidents and improve system performance.

CERTIFICATIONS

- Google Analytics Certification | Google | Issued May 2026 · Expires May 2027

- Training & Mentorship Program| EIT Higher Education Initiative |Completed December 2025

- Blended Mobility Project — Digitalization of Cultural Heritage | Brandenburg University of Applied Sciences / UNESCO Chair | Completed May 2026

- Blended Mobility Project — Digitalization of Cultural Heritage | Brandenburg University of Applied Sciences / UNESCO Chair | Completed May 2026
